1. OVERVIEW & SCOPE

1.1. PURPOSE

This document establishes the binding functional and technical requirements for the Avenix's website. It serves as the objective checklist to measure project progress, verify feature completion, and protect both parties against scope changes.

1.2. SUMMARY

Development of a comprehensive, fully automated Real Estate Digital Marketplace Platform.

The platform supports absolute brand awareness, advanced interaction, digital customer engagement, marketplace operations, and systemic automation tailored for plot sales and land survey services.

Operational goals:

- i. **Digital Presence:** Creating interactive and responsive professional website and social media profiles for establishing a trustworthy digital presence.
- ii. **Property Marketing & Lead Generation:** Attracting buyers for plots via organic SEO and social tracking.
- iii. **Customer Engagement:** Allowing interactive portal communications, favorites, and likes.
- iv. **Online Reservations & Bookings:** Securing plot viewing reservations and booking land survey teams.
- v. **Invoicing:** Generating and managing invoices and detailed accounting trails.

- vi. **Reporting & Intelligence:** Reporting and analyzing operational overview of leads and market.

1.3. TARGET AUDIENCE & CORE USER ROLES

The system isolates functionality across eight explicit user personas:

- i. **Public Visitor:** Unauthenticated visitor browsing listings, blog posts, and generic company information.
- ii. **Registered Customer:** Authenticated client tracking plot purchases, survey documents, and invoices.
- iii. **Administrator:** Corporate staff handling survey updates, approving listings, and managing general client leads.
- iv. **Super Administrator:** Full system developer/owner control over all settings, feature toggles, and financial ledgers.

1.4. ASSUMPTIONS & DEPENDENCIES

The successful delivery of this project depends on the following:

- i. Client shall provide company logos, branding materials, property images, survey documents, company profile content, and service descriptions.
- ii. Client shall provide all legal information necessary for publication of land listings and survey services.
- iii. Domain registration and hosting deployment are subject to successful payment of one-third of the whole payment and availability of the requested domain name.
- iv. Third-party services such as SMS providers, WhatsApp Business APIs, payment gateways, Google Maps APIs, and email services remain subject to the policies and uptime of their respective providers.
- v. Delays in client feedback, approvals, or content submission may impact project timelines.

2. CORE FRONTEND PAGES & MARKETING FEATURES

The frontend interface must be fully dynamic and optimized for mobile devices, tablets, and desktop displays.

- **Home Page:** Hero banner, advanced plot search filters, featured land listings, and service overviews.
- **Services Page:** Explanatory copy detailing plot purchasing processes, land verification workflows, and specialized land survey capabilities.
- **Listing & Property Details:** A grid-view catalog displaying all available land parcels, filterable by size (square meters/acres), location/region, price range, and zoning type.
- **Testimonial & FAQ:** A dedicated social proof section featuring past customer reviews and completed land transaction case studies and accordion-style answers to common legal land questions.
- **Blog Page (Advertisement Feature):** A content-driven marketing section used for Search Engine Optimization (SEO) to

attract organic traffic and post industry news or seasonal promotional banners.

- **Contact Us, Privacy Policy, & Terms:** Interactive contact forms, live click-to-call links, official office email routing, and social media connectivity profiles, Lead forms, location pins, and regulatory data compliance disclaimers.

3. THE MARKETPLACE, PROPERTY ENGINE & USER PORTALS

3.1. PROPERTIES MANAGEMENT MODULE

- **Dynamic Inventory System:** The platform must support extensive data fields for every land listing, including GPS coordinates, plot numbers, survey map attachments, ownership history, and local utility availability.
- **Status Management:** Listings must feature automated or admin-controlled state flags: Available, Under Review, Reserved, or Sold.

3.2. MARKETPLACE ARCHITECTURE & USER PORTALS

- **My Account Page (Client Portal):** A secure, authenticated dashboard for external users.
 - *Sellers:* Can upload their own plots for sale by entering dimensions, price, images, and scanning/uploading deed proofs.
 - *Buyers:* Can bookmark target plots, communicate with sellers, and track purchased plot document progress.
- **Search & Filter Matrix:** Users can browse listings and filter by plot size (M²/acres), location region, price range, and survey availability.
- **Property Submission Workflow:** Third-party owners can submit plots. Submissions enter a pending state for Admin review, document validation, and formal publication.
- **Reservation & Booking System:** Direct frontend options to reserve a plot or book a surveyor via calendar time slots.
- **User Management:** Platform administrators must have a single master panel to view user profiles, ban malicious accounts, or elevate internal personnel roles (e.g., assigning a staff member as a "Field Surveyor").

3.3. LAND SURVEY INTEGRATION & LIBRARY ARCHIVE

- **Online Survey Request Workflow:** A dedicated interactive scheduling form where users pin their land location on an

embedded digital map, input raw dimensions, and submit requests for on-site surveyors.

- **Library (File & Images Archive):** A secure cloud storage database where clients and administrators can upload, store, and download heavy files, including PDF land titles, official survey blueprints, topographical maps, and boundary photographs.

3.4. FEATURE TOGGLE SYSTEM

The platform shall include administrative controls allowing authorized personnel to activate or deactivate selected modules without requiring source code modifications or redevelopment.

Modules eligible for activation/deactivation include:

- Property Owner Submissions
- Marketplace Functions
- Online Reservations
- Online Bookings
- Payment Processing
- WhatsApp Notifications
- SMS Notifications
- Blog Module
- Testimonials Module
- CRM Lead Tracking

The objective is to allow business expansion without requiring platform reconstruction.

4. COMMUNICATION AUTOMATION & FINANCIAL TOOLS

4.1. AUTOMATED NOTIFICATIONS ENGINE

- **Push SMS Sender ID Configuration:** Provisioning an official branded alphanumeric SMS Sender ID (e.g., REALESTATE) for high-priority business alerts.

- **Push SMS Balance Integration:** The system will pre-load an API allocation of **1,000 Push SMS units**. Automated texts will fire based on system events:
 - *Event A:* SMS sent to buyer confirming a land booking or listing submission.
 - *Event B:* SMS sent to a survey client stating: **"Ukaguzi na uchambuzi wa site yako umekamilika, tafadhari angalia kwenye account yako kuona nyaraka zako."**
- **WhatsApp Integration:** Active API routing enabling automated status updates, listing links, and PDF invoice confirmations delivered directly to the client's WhatsApp number (pp. 1-2).

4.2. INVOICE MANAGEMENT MODULE

- **Automated Billing:** The backend engine will auto-generate digital invoices when a client selects a plot or books a survey service (pp. 1-2).
- **Portal Ledger:** Invoices will itemize fees, track transaction numbers, and display payment statuses (Unpaid, Partial, Fully Paid) for transparent record-keeping.
- **Payment Ledger:** Displays payment states (Unpaid, Partial, Fully Paid) inside client and admin panels (pp. 2-3).

4.3. EMAIL AUTOMATION

The system shall support automated email communications including:

- Welcome Emails
- Reservation Confirmations
- Booking Confirmations
- Invoice Notifications
- Password Reset Requests
- Property Status Updates
- Survey Completion Notifications

Email templates shall be configurable by administrators.

5. TECHNICAL INFRASTRUCTURE & BASE INCLUSIONS

The contract price guarantees the configuration and maintenance of the baseline infrastructure for a **one-year period**:

- **Domain Name Registration:** Securing the [avenix.co.tz](https://www.avenix.co.tz) web address for 12 months.
- **Premium Web Hosting Setup:** Deployment on a cloud-hosted infrastructure environment capable of managing database transactions, image uploads, and customer file sorting.
- **Professional Email Accounts:** A minimum of two (2) professional email accounts shall be created under the company domain. Examples:
 - info@avenix.co.tz
 - sales@avenix.co.tzAdditional email accounts may be created subject to hosting limitations.
- **Search Engine Optimization (SEO) Baseline:** Setup of meta-tags, clean URL schemes, automated site-mapping, and image alt-attributes across all pages to guarantee Google indexing capabilities.
- **Google Maps API Integration:** Interactive maps embedded on the contact page and listing details to show exact physical land landmarks and property boundaries.
- **Social Media Profile Hooks:** Structural linkage connecting the website's headers and footers to Facebook, Instagram, Threads, Pinterest, Google Business Profile, and TikTok.

5.1. SECURITY REQUIREMENTS

The platform shall implement:

- SSL/TLS encryption
- Secure password hashing
- Role-based access control
- Session management
- Login activity tracking
- Administrative audit logs
- File upload validation

- Database backup procedures

The system shall restrict unauthorized access to administrative and financial information.

5.2. PERFORMANCE REQUIREMENTS

The system shall:

- Support concurrent user access.
- Be responsive across desktop, tablet, and mobile devices.
- Optimize images and media delivery.
- Maintain acceptable page load speeds under normal operational conditions.
- Support future scaling as listings and users increase.

6. PROJECT EXCLUSIONS

The following items are not included unless otherwise agreed in writing:

- Native Android Applications
- Native iOS Applications
- Advanced GIS Mapping Systems
- Drone Survey Systems
- Online payments integration
- Accounting ERP Integrations
- Government Land Registry Integrations
- AI Property Valuation Engines
- Custom Mobile Applications
- Additional SMS Credits beyond the included allocation
- Additional hosting resources beyond package limits

Any functionality outside this specification shall be treated as a change request and may incur additional charges.

7. PROJECT PHASES, DELIVERABLES & ACCEPTANCE MATRIX

7.1. PROJECT EXECUTION PHASES

Development proceeds sequentially across five operational milestones:

- i. **Design Phase:** Wireframing and layout confirmation.
- ii. **Development Phase:** Core coding and module implementation.
- iii. **Testing Phase:** Security audits and functional evaluations.
- iv. **Deployment Phase:** Cloud hosting launch and domain configuration.
- v. **Training Phase:** Walkthrough sessions instructing client staff on admin dashboard operations.

7.2. FINAL PROJECT DELIVERABLES CHECKLIST

The project is complete when the following assets are delivered:

- i. Live production website and digital marketplace platform.
- ii. Functional Customer and Administrator portals.
- iii. Integrated payment, SMS, and WhatsApp automation systems.
- iv. Full handover of system source code repositories.
- v. Operational system documentation and training protocols.

7.3. MODULE-BY-MODULE ACCEPTANCE MATRIX

The client will use this checklist to test and verify the final application. Every item must achieve a confirmed "Pass" state to conclude the project:

Module Tracker	Functional Requirement to Test	Target Result	Sign-Off (Pass/Fail)
Property Management	Create, update, and delete land plots in the backend.	Pass	
Reservation System	Create and track a land plot viewing reservation.	Pass	
Booking System	Book a land survey team via the interactive form.	Pass	
Website Design	A complete working web pages as specified.	Pass	
SMS Integration	Automatically send out a registration or transactional SMS.	Pass	
Email Integration	Deliver automated invoice and welcome notifications via email.	Pass	
Marketplace Engine	Search and filter listings by location, price, and dimensions.	Pass
